

## Instructions

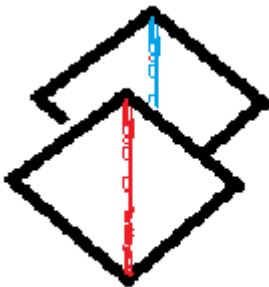

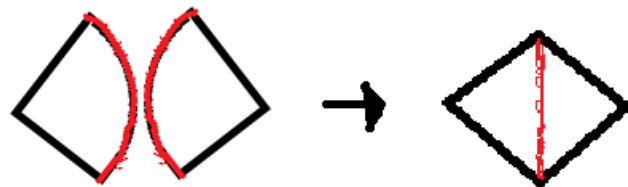

Cut a circle (25 cm-28 cm diameter)

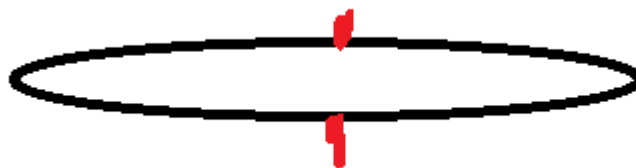

Cut the circle into 4 equally big nacho pieces

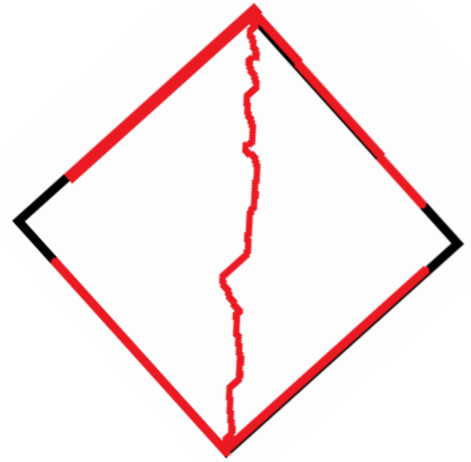

Sew the edges of two nachos together (Do this 2 times)

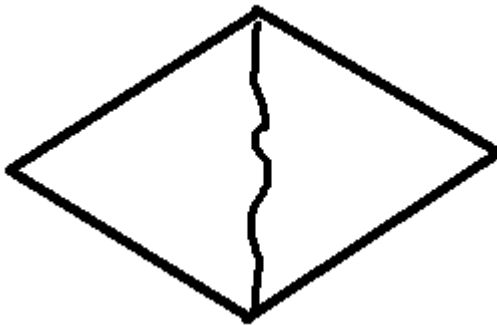

Place the 2 together-sewed-nachos on top of one another with their sewed parts looking outside

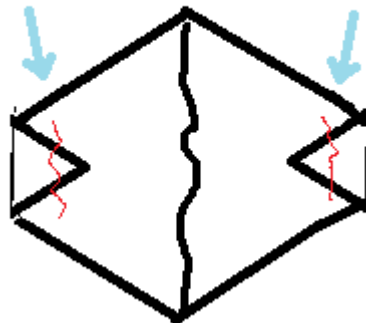

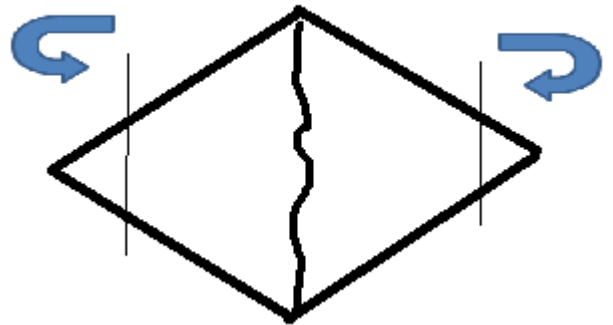

Sew together the top and bottom parts, leaving a 2cm -3cm edge to the right and the left.

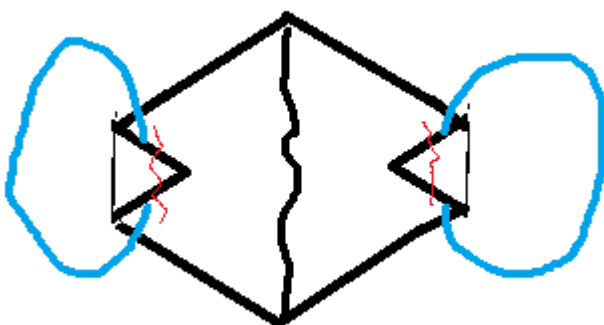

Pull , from one of the left or right edges, the whole thing so that you have everything insideout (so that the sewed parts are inside).

Fold the outer edges through the shown line and sew!

Take 2 ~20cm cords and pass them through the orifices you just created. Tie the the cords together and ta dah!

You have your very own Mundschutzmaske :D !
